Aliyah Bolden Final Project – MMP 210

1. Type: Media Interaction
2. Audience: Anime Lovers / Sailor Moon Lovers
3. Interaction: The user will be able to have a choice of two buttons. One button allows them to spin a scepter in the middle of the page, and the other will allow them to play the theme song.
4. Libraries: P5.JS, P5 Sound
5. Data: I will create my own JSON file where it will have all the notes for the song (grabbed from the sound "midi" js) and stored there to be called later in the js file.
